

Confirmation

Paint compatibility/PWIS-free

Hereby we confirm, that below mentioned flow meters from KEM Küppers Elektromechanik GmbH are paint compatible and PWIS-free according to following terms (chapter 1), i.e. the products themselves will not contain significant traces of paint-wetting impairment substances nor shed paint-wetting impairment substances to the medium to be measured.

1. Terms

- silicone-free: free of silicones or substances containing silicones
- PWIS-free, paint compatible: free of paint-wetting impairment substances, amongst others oil, grease, silicone or substances containing silicones.

2. General requirement

In order to guarantee PWIS-free delivered products, this option must be specified on customer's purchase order and also be noted in the corresponding manufacturer's order confirmation.

3. Objective

In principle, all flow meter product groups ZHM, SRZ and HM do not contain any materials that endanger PWIS-free. At the end of the manufacturing process, any potentially hazardous substances that are introduced during the manufacturing process are removed by disassembly, cleaning and a suitable rinsing process.
